

With the development of Cutting Edge Technology Solutions, we enable our clients to attract new customers, understand their in-store behavior, increasing their loyalty by enhancing their shopping experience in a safety environment.

Interax Tailgating

ONE MAJOR WEAKNESS, of most automated access control systems is the fact that it cannot actually control how many people enter the building when an access card is presented. Most systems allow you to control which card works at which door, but once an employee opens the door, any number of people can follow behind the employee and enter into the building. Similarly, when an employee exits the building, it is very easy for a person to grab the door and enter the building as the employee is leaving. This behavior is known as tailgating.

BASED ON CUTTING EDGE COGNITIVE VISION AND VIDEO ANALYTICS SOFTWARE, *Interax Tailgating Solution* offers a cost efficient, scalable, and easy-to-install tool for preventing tailgating running embedded directly in standard IP cameras.

Interax Tailgating

BENEFITS OF TAILGATING

Let Interaxlink Tailgating Solution be a central tool for improving your access control system.

- Increase security of the premises.
- Detect unauthorized entry.
- Enforce the use of valid cards or keys.
- Improve roll call accuracy by providing information on number of card holder entries.

REPORTING

Interax Tailgating Solution lets you view important statistics like:

- *Number of visitors,*
- *Instances of tailgating,*
- *Type of tailgating.*

Data is updated in real time by logging into the camera via your web browser. It does not require any additional software. With the additional software package Interaxlink Web Report you get a powerful statistics tool that works seamlessly with Interaxlink Tailgating Solution. It helps you analyze people counting data, manage multi-site installations and export data to compare with:

- *Additional security systems,*
- *Building automation systems,*
- *Staffing levels, etc.*

The unit detects in real time when a tailgating event occurs. On detection send SMS, play sound files, etc.

SYSTEM OVERVIEW

Interax Tailgating Solution is an automated stand-alone, two way people counting tailgating system for ceiling mounted cameras. The unit detects in real time when a tailgating event occurs. The detection event can be used to send video clips, SMS, play sound files, etc. The installation is so easy that it can be performed and maintained by your own staff. Furthermore, accessing the camera over IP is very cost efficient for maintenance, where you can manage camera and people counting remotely.

Interax Tailgating Solution runs directly on your IP camera, and data can be retrieved for analysis on timed intervals. The software is modular and completely autonomous with all counting done on the camera's CPU, requiring no dedicated PC. Manage, analyze and view data from any number of units and from multiple sites, using Interax Web Report.

FEATURES

- *Automated system, operated in real time, fully embedded into ip cameras.*
- *Privacy secure.*
- *Access privileges.*
- *Digital zoom.*
- *Wide entrance can be covered by several synchronized units in a master/slave setup.*
- *Easy to install and setup.*
- *Easy parameter backup.*
- *Maintain your people counter remotely over IP, set and monitor parameters, download or stream video.*
- *Seamless integration with Inerax Web Report.*
- *Two way counting: counts people moving in two directions simultaneously.*
- *Accurate counting even under high density conditions or with baby carriages or trolleys present.*
- *Leading digital image processing minimizes shadow and reflection problems.*
- *Open protocol lets you integrate with data from POS and other systems.*

SPECIFICATIONS

- *Fully embedded.*
- *Minimum height over floor: 2.5 meters*
- *Maximum entrance width with one unit: 8.0 meters.*

- *An IP Camera equipped with Interax Tailgating offers an unmatched stand alone solution.*
- *Not requiring a PC for People Counting.*
- *The unit detects in real time when a tailgating event occurs. On detection send SMS, play sound files, etc.*
